

Instructions for Packing & Hauling AEP Net

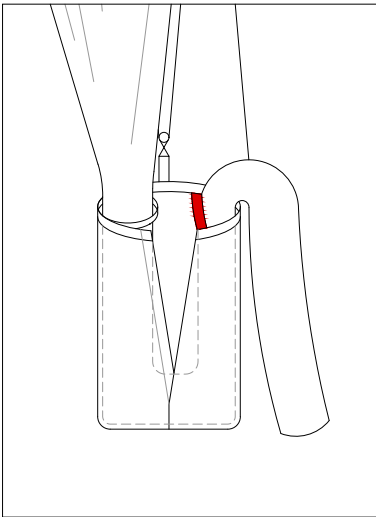

1: With the bag in the lowered, open and unclipped position, gather the curtain.

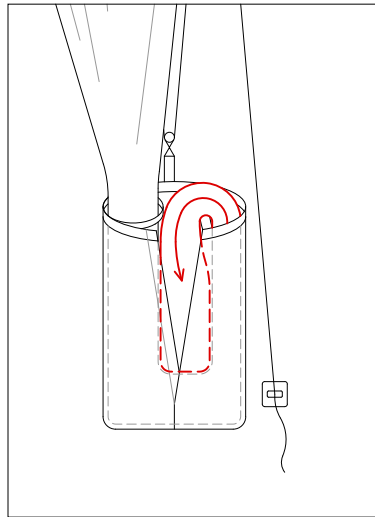

2: Clip the gathered curtain into the bag at the side closest to the curtain rail. (25mm strap)

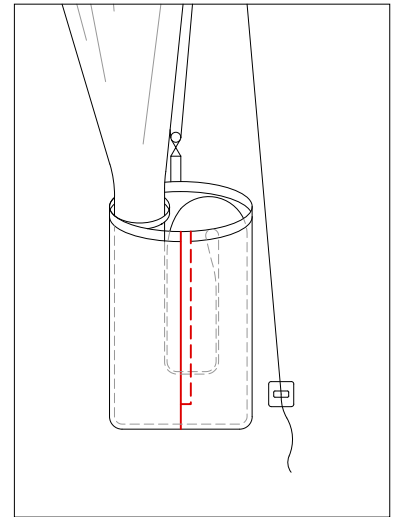

3: Twist the trailing curtain to gather it and lay it into the bag and up the opposite side.

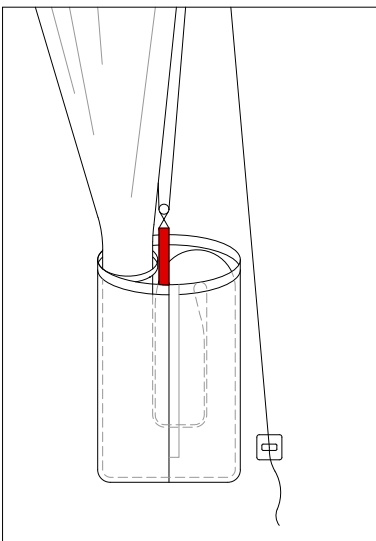

4: Clip the bag restraint together (40mm clip) and adjust.

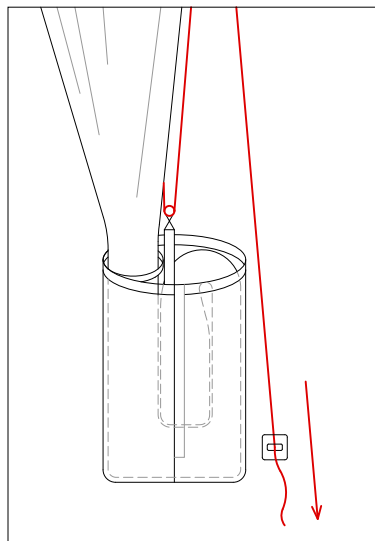

5: Flip the remaining curtain over the restraining strap and tuck into the bag.

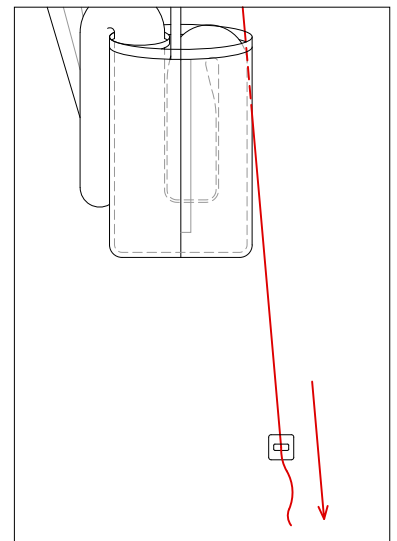

6: Close the bag.

7: Clip the haul strap top the front of the bag and adjust.

8: Slowly haul the bag.

9: Secure and stow the rope.

To lower the bag, ensure rope is being held securely at all times. Disengage cleat and lower the bag slowly paying attention to where the bag is travelling. Reverse above procedure to unpack. Draw curtain and secure in the centre of the range.
